

Cem Yasan

Sr. Unity Game Developer

Ankara, Türkiye • +90-555-783-1993 • yasancem@gmail.com • [linkedin.com/in/yasancem](https://www.linkedin.com/in/yasancem) • cemyasan.github.io

Senior Unity Developer with 10+ years in Mobile and VR. Proven Project Lead for hybrid-casual RPG “Space Heroes: Epic Galaxy RPG”. My expertise covers the full software development lifecycle, from designing rapid prototypes to managing live operations and technical architecture, with diverse experience ranging from mobile games to medical VR simulations.

SKILLS

Technical Skills: Unity, Git, C#, C++, Java, Android, Blender

Languages: Turkish (Native), English (Fluent)

WORK EXPERIENCE

Sr. Game Developer Jun 2022 – Jul 2023 (Part-time), Jul 2023 – July 2025 (Full-time)

Udo Games, Ankara, Türkiye

- Went back to my old company to work on hybrid-casual mobile games.
- Mostly would take on all the development work in a project. After testing, games with potential data would be iterated further or otherwise killed.
- Worked as the project development lead for a year for a casual RPG game called “Space Heroes: Epic Galaxy RPG”. Also worked as the PM, in addition to being a developer, for a few months during the game's later update cycles.

VR Developer Apr 2021 – Jun 2022 (Full-time), Jun 2022 – Jul 2023 (Part-time)

DancingMind Therapeutics, Singapore (Worked remotely)

- It was a company based in Singapore that used virtual reality therapy content to help people with dementia and stroke.
- I’ve worked on many VR projects that were mini-games, serious games, or experiences.
- I’ve led the development cycles of these projects.

Part-time Lecturer Jan 2020 – Jun 2020 Istanbul Bilgi University, Istanbul, Türkiye

- Gave a lecture about game development practices on mobile and VR platforms to Digital Game Design students for a semester.
- Students were expected to present one hyper-casual and one VR game during the time.

Partner - Game Developer Feb 2019 – April 2021 Soup Games, Istanbul, Türkiye

- A hyper-casual/mobile game studio where my partner and I developed various hyper-casual games/prototypes for publishers.
- These prototypes had an average of 2-week pipelines for ideation, design, and development to end up in a test release. Publishers would test out these games for potential data.

Game Developer Apr 2018 – Feb 2019 Flamingo Game Studio, Istanbul, Türkiye

- Took on the responsibility for development work in a startup company that was mainly focused on making B2B XR and Kinect projects at the time.

Game Developer - Programmer Jan 2016 – Mar 2018 Codemodeon, Istanbul, Türkiye

- Working mainly on a VR game called “*Header Goal VR: Being Axel Rix*” as the sole developer. It is available for both HTC Vive and Oculus Rift.
- Also worked on many other B2B projects on XR and Kinect platforms.

Sr. Game Developer Jun 2014 – Aug 2014 (Intern), Aug 2014 – Dec 2015 (Full-time)

Udo Games, Ankara, Türkiye

- Worked on multiple -mostly game-related- projects every month while developing some games on the other side, mostly working in Unity3D.

EDUCATION

Gazi University, Ankara, Türkiye 2015 Bachelor of Engineering — Computer Engineer

Bahcesehir University, Istanbul, Türkiye 2017 - 2026 Game Design

- Wrote my thesis, "*Adapting Playability Heuristics for the Constraints of Hyper-Casual Games: A Framework for Market-Focused Game Design*". Focus on bridging academic theory with the practical realities of the hyper-casual market.
